

Construction Inspection Engineer – Burr Ridge / Chicago, IL

ABNA is seeking a **Construction Inspection Engineer** for our **Burr Ridge, IL** location specializing in site development. The Construction Inspector Engineer is a vital member of the Construction Management team and will work under the guidance of the Project Leader (Resident Engineer) and/or Construction Engineer. Responsibilities of the position are to perform inspection of construction activities, document conformance to plans and specifications, sample/test materials, document contract quantities, and ensure high-quality construction for transportation projects. This position will provide the opportunity for growth, where continuing development and participation in professional societies will be encouraged and supported.

Responsibilities:

- Responsible for monitoring contractor conformance to plans and specifications, quality, and schedule for assigned construction activities.
- Performs daily field inspections and maintains inspection records.
- Assists in the completion of reports.
- Keeps Resident Engineer informed of work load and daily activities.
- Is active in technical societies.
- Proactively interacts with the contractor to track crew work and equipment on the project.
- Is able to attend meetings or events outside of normal working hours.
- Can communicate with clients effectively
- Actively observes and acts in an appropriate manner related to safety.

Requirements:

- Bachelor's degree in Civil Engineering or Construction Management from an accredited four-year University and 0-4 years of Construction Management experience, or an Associates degree in Civil Engineering or Construction Management from an accredited technical college and 0-10 years of Construction Management experience.
- Experience with Microsoft Word, Microsoft Excel, and construction management databases/tracking software is required for this role
- **Engineer-In-Training (E.I.T.)** or ability to obtain within one year for degreed engineers
- Ability to obtain certifications for material sampling/testing for aggregates, concrete, asphalt, grading, etc.
- Ability to obtain certifications for inspection of roadways, SWPPs, bridges, etc.
- Valid driver's license

Additional Information:

- **A company vehicle will be provided**

Physical demands include standing, walking, bending and ability to lift 25lbs. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
